

AHMED KHALIL

Cairo, Egypt | +20 108 039 6780 | ahmedmkhalil.work@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Backend Developer specializing in C# and ASP.NET Core. Designs and delivers secure, maintainable RESTful APIs using Clean Architecture and CQRS. Implements JWT authentication, permission-based authorization, caching, rate limiting, API versioning, health checks, localization, and background processing. Integrates AI models into backend services and works with EF Core, Dapper, and SQL Server.

EXPERIENCE

Backend Developer Intern — [Inovext LTD, England \(Remote\)](#) · Feb 2025 – Apr 2025

- Developed scalable backend services using C#, ASP.NET Core, EF Core, LINQ, and SQL Server, using LLM-assisted development tools to accelerate code generation and refactoring.
- Streamlined developer workflows and integration pipelines within a remote team.

Backend Developer Intern — [Egyptian Cabinet Information & Decision Support Center \(On-site\)](#) · Aug 2025

- Engineered backend services using CQRS with MediatR, RBAC authentication with ASP.NET Core Identity + JWT, multi-language localization, and centralized logging with Serilog and Seq.
- Collaborated with a cross-functional backend team to deliver scalable appointment-scheduling workflows.

Backend Developer Intern — [ElitesXTech \(Remote\)](#) · Aug 2023 – Apr 2024

- Designed modular data access layers with custom patterns to abstract multi-branch data storage and authentication.
- Built lightweight RESTful endpoints with Dapper ORM and SQLite for high-frequency transaction logging and offline data sync, enforcing strict API standards through code reviews.

EDUCATION

Capital University (formerly Helwan University) — B.Sc. in Computer Science · 2022 – 2026 · GPA 3.12/4.0 (Very Good)

ExploreAI Academy — Certificate, Data Science · Aug 2023 – Aug 2024 · Cairo, Egypt · Hybrid

SELECTED PROJECTS

MedAI Healthcare Platform — *Graduation Project, Team of 6* [\[Repo\]](#) [\[Live demo\]](#)

- Developed a 34-endpoint ASP.NET Core Web API with EF Core, Identity, and JWT role-based access for patients, doctors, and admins.
- Integrated a PyTorch X-ray classification model over HTTP and built a doctor review workflow to confirm or override AI results.
- Implemented appointment booking with slot capacity, overlap protection, and double-booking prevention.
- Added FluentValidation, server-side pagination, the Result Pattern, and a global exception handler.

Vezeeta Medical Platform — *Internship Project, IDSC* [\[Repo\]](#)

- Built a doctor booking API with CQRS and MediatR, 19 endpoints, and JWT role-based access for admins, doctors, and patients.
- Implemented priced time slots, coupon discounts, booking confirmation, Arabic and English localization, and Serilog with Seq logging.
- Applied the Result Pattern and FluentValidation for consistent errors and input validation across all commands.

Survey Management System — *Personal Project* [\[Repo\]](#)

- Built a polling API with 38 endpoints, a custom permission-based authorization policy provider, JWT refresh tokens, and account logout.
- Added Hangfire background and recurring jobs, MailKit email templates, HybridCache, rate limiting, API versioning, and health checks.
- Implemented voting rules with one vote per user and publish and date-window checks, plus per-poll result reports.

Software Company ERP System — *Personal Project* [\[Repo\]](#)

- Built a project and task management API with Clean Architecture, CQRS with MediatR, and 39 endpoints covering departments, teams, employees, projects, and tasks.
- Implemented permission-based authorization with JWT and refresh tokens, plus MediatR pipeline behaviors for validation and automatic audit logging.
- Modeled a multi-role workflow from project request to owner approval, team assignment, and task review.

Haunted Escape Room ERP — *Internship Project, Inovext LTD* [\[Client site\]](#)

- Built the sales-tracking backend for a multi-branch business using the Broker Pattern, with Dapper and SQLite REST APIs and offline branch sync.

Game Management Portal — *Personal Project* [\[Repo\]](#)

- Built an ASP.NET Core MVC app for managing a game catalog with full CRUD, a many-to-many games and devices relation, and cover image upload.
- Added custom validation attributes for file type and size, anti-forgery protection, a service layer with dependency injection, and AJAX deletion with confirmation.

Fitness Tracker Library — *Internship Team Project, ElitesXTech* · NuGet, 500+ downloads [\[NuGet\]](#)

- Contributed to a team-built .NET Standard library for calorie calculation, writing its XML documentation and improving error handling for invalid input.

SKILLS

Software Fundamentals: OOP, SOLID Principles, Data Structures, Algorithms

Web Development: C#, HTML, CSS, JavaScript, Bootstrap, ASP.NET MVC

Backend Technologies: ASP.NET Core, Web API, LINQ, EF Core, Dapper, Identity

Architecture & Security: Clean Architecture, CQRS, REST APIs, Dependency Injection, JWT Authentication, Role and Permission-Based Authorization

Libraries & Tools: MediatR, FluentValidation, Mapster, Hangfire, MailKit, Serilog, Seq, Swagger, Postman

Database Management: SQL Server, SQLite, Database Design

Version Control: Git, GitHub

Currently Learning: Azure, CI/CD with GitHub Actions, Docker, Unit Testing with xUnit

CERTIFICATIONS

Foundational C# with Microsoft (freeCodeCamp) · Competitive Programming Training (Coach Academy)

LANGUAGES

Arabic (Native) · English (Fluent)
